EBA's last proposal, 29 June 2017	European Commission's latest version, 27 November 2017
CHAPTER I GENERAL PROVISIONS	CHAPTER I GENERAL PROVISIONS
<p>Article 2 General authentication requirements</p> <p>1. Payment service providers shall have transaction monitoring mechanisms in place that enable them to detect unauthorised or fraudulent payment transactions for the purpose of the implementation of the security measures referred to in points (a) and (b) of Article 1. Those mechanisms shall be based on the analysis of payment transactions taking into account elements which are typical of the payment service user in the circumstances of a normal use of the personalised security credentials.</p> <p>2. Payment service providers shall ensure that the transaction monitoring mechanisms take into account, at a minimum, each of the following risk-based factors:</p> <ul style="list-style-type: none"> (a) lists of compromised or stolen authentication elements; (b) the amount of each payment transaction; (c) known fraud scenarios in the provision of payment services; (d) signs of malware infection in any sessions of the authentication procedure; (e) in case the access device or the software is provided by the payment service provider, a log of the use of the access device or the software provided to the payment service user and the abnormal use of the access device or the software. 	<p>Article 2 General authentication requirements</p> <p>1. CHAPTER 1 GENERAL PROVISIONS	CHAPTER 1 GENERAL PROVISIONS
<p>Article 3 Review of the security measures</p> <p>1. The implementation of the security measures referred to in Article 1 shall be documented, periodically tested, evaluated and audited in accordance with the applicable audit framework of the payment service provider by auditors with expertise in IT security and payments and operationally independent within or from the payment service provider in accordance with the applicable audit framework of the payment service provider.</p> <p>2. The period between the audit reviews referred to in paragraph 1 shall be determined taking into account the relevant accounting and statutory audit framework applicable to the payment service provider. However, payment service providers that make use of the exemption referred to in Article 17 shall perform an audit for the methodology, the model and the reported fraud rates at a minimum on a yearly basis. The auditor performing the audit shall have expertise in IT security and payments and be operationally independent within or from the payment service provider. During the first year of making use of the exemption under Article 17 and at least every three years thereafter, or more frequently at the competent authority's request, this audit shall be an external audit.</p> <p>3. The audit review shall evaluate and report on the compliance of the payment service provider's security measures with the requirements set out in this Regulation. The entire report shall be made available to competent authorities upon their request.</p>	<p>Article 3 Review of the security measures</p> <p>1. The implementation of the security measures referred to in Article 1 shall be documented, periodically tested, evaluated and audited in accordance with the applicable legal framework of the payment service provider by auditors with expertise in IT security and payments and operationally independent within or from the payment service provider.</p> <p>2. The period between the audits referred to in paragraph 1 shall be determined taking into account the relevant accounting and statutory audit framework applicable to the payment service provider. However, payment service providers that make use of the exemption referred to in Article 18 shall be subject to an audit of the methodology, the model and the reported fraud rates at a minimum on a yearly basis. The auditor performing this audit shall have expertise in IT security and payments and be operationally independent within or from the payment service provider. During the first year of making use of the exemption under Article 18 and at least every three years thereafter, or more frequently at the competent authority's request, this audit shall be carried out by an independent and qualified external auditor.</p> <p>3. This audit shall present an evaluation and report on the compliance of the payment service provider's security measures with the requirements set out in this Regulation. The entire report shall be made available to competent authorities upon their request.</p>

CHAPTER II SECURITY MEASURES FOR THE APPLICATION OF STRONG CUSTOMER AUTHENTICATION	CHAPTER II SECURITY MEASURES FOR THE APPLICATION OF STRONG CUSTOMER AUTHENTICATION
<p>Article 4 Authentication code</p> <p>1. Where payment service providers apply strong customer authentication in accordance with Article 97(1) of Directive (EU) 2015/2366, the authentication shall be based on two or more elements which are categorised as knowledge, possession and inherence and shall result in the generation of an authentication code. The authentication code shall be only accepted once by the payment service provider when the payer uses the authentication code to access its payment account online, to initiate an electronic payment transaction or to carry out any action through a remote channel which may imply a risk of payment fraud or other abuses.</p> <p>2. For the purpose of paragraph 1, payment service providers shall adopt security measures ensuring that each of the following requirements is met:</p> <ul style="list-style-type: none"> (a) no information on any of the elements referred to in paragraph 1 can be derived from the disclosure of the authentication code; (b) it is not possible to generate a new authentication code based on the knowledge of any other authentication code previously generated; (c) the authentication code cannot be forged. <p>3. Payment service providers shall ensure that the authentication by means of generating an authentication code includes each of the following measures:</p> <ul style="list-style-type: none"> (a) where the authentication for remote access, remote electronic payments and any other actions through a remote channel which may imply a risk of payment fraud or other abuses has failed to generate an authentication code for the purposes of paragraph 1, it shall not be possible to identify which of the elements referred to in that paragraph was incorrect; (b) the number of failed authentication attempts that can take place consecutively, after which the actions referred to in Article 97(1) of Directive (EU) 2015/2366 shall be temporarily or permanently blocked, shall not exceed five within a given period of time; (c) the communication sessions are protected against the capture of authentication data transmitted during the authentication and against manipulation by unauthorised parties 	<p>Article 4 Authentication code</p> <p>1. <p>Article 31 Obligations for a dedicated interface</p> <p>1. Subject to compliance with Article 29 and 30, account servicing payment service providers that have put in place a dedicated interface shall ensure that the dedicated interface offers the same level of availability and performance, including support, as the interfaces made available to the payment service user for directly accessing its payment account online.</p> <p>2. Account servicing payment service providers that have put in place a dedicated interface shall define transparent key performance indicators and service level targets, at least as stringent as those set for the interface used by their payment service users. Those shall be complemented with qualitative adequate measures and stress tested to evidence the validity of these measures.</p> <p>3. For the purpose of paragraphs 1 and 2, account servicing payment service providers shall monitor the availability and performance of the dedicated interface. Account servicing payment service providers shall publish statistics on the availability and performance of the dedicated interface and of the interface used by its payment service users on a quarterly basis. The statistics shall also be made available, upon request, to the competent authorities.</p>	<p>Article 32 Obligations for a dedicated interface</p> <p>1. Subject to compliance with Article 30 and 31, account servicing payment service providers that have put in place a dedicated interface shall ensure that the dedicated interface offers at all times the same level of availability and performance, including support, as the interfaces made available to the payment service user for directly accessing its payment account online.</p> <p>2. Account servicing payment service providers that have put in place a dedicated interface shall define transparent key performance indicators and service level targets, at least as stringent as those set for the interface used by their payment service users both in terms of availability and of data provided in accordance with Article 36. Those interfaces, indicators and targets shall be monitored by the competent authorities and stress-tested.</p> <p>3. Account servicing payment service providers that have put in place a dedicated interface shall ensure that this interface does not create obstacles to the provision of payment initiation and account information services. Such obstacles, may include, among others, preventing the use by payment service providers referred to in Article 30(1) of the credentials issued by account servicing payment service providers to their customers, imposing redirection to the account servicing payment service provider's authentication or other functions, requiring additional authorisations and registrations in addition to those provided for in Articles 11, 14 and 15 of Directive 2015/2366, or requiring additional checks of the consent given by payment service users to providers of payment initiation and account information services.</p> <p>4. For the purpose of paragraphs 1 and 2, account servicing payment service providers shall monitor the availability and performance of the dedicated interface. Account servicing payment service providers shall publish on their website quarterly statistics on the availability and performance of the dedicated interface and of the interface used by its payment service users.</p>

CHAPTER V COMMON AND SECURE OPEN STANDARDS OF COMMUNICATION	CHAPTER V COMMON AND SECURE OPEN STANDARDS OF COMMUNICATION
SECTION 2 SPECIFIC REQUIREMENTS FOR THE COMMON AND SECURE OPEN STANDARDS OF COMMUNICATION	SECTION 2 SPECIFIC REQUIREMENTS FOR THE COMMON AND SECURE OPEN STANDARDS OF COMMUNICATION
<p>Article 32 Contingency measures for a dedicated interface</p> <p>1. Account servicing payment service providers shall include, in the design of the dedicated interface, a strategy and plans for contingency measures in the event of a performance that does not comply with Article 31, unplanned unavailability of the interface and systems breakdown.</p> <p>2. In the event described in paragraph 1, , both the account servicing payment service provider and the payment service providers referred to in Article 29(1) shall report that fact to their respective competent national authorities without delay.</p> <p>3. Contingency measures shall include communication plans to inform payment service providers making use of the dedicated interface in the event described in paragraph 1, measures to bring the system back to business as usual and a description of alternative options payment service providers may make use of during this time.</p>	<p>Article 33 Contingency measures for a dedicated interface</p> <p>1. Account servicing payment service providers shall include, in the design of the dedicated interface, a strategy and plans for contingency measures for the event that the interface does not perform in compliance with Article 32, that there is unplanned unavailability of the interface and that there is a systems breakdown. Unplanned unavailability or a systems breakdown may be presumed to have arisen when five consecutive requests for access to information for the provision of payment initiation services or account information services are not replied to within 30 seconds.</p> <p>2. Contingency measures shall include communication plans to inform payment service providers making use of the dedicated interface of measures to restore the system and a description of the immediately available alternative options payment service providers may have during this time.</p> <p>3. Both the account servicing payment service provider and the payment service providers referred to in Article 30(1) shall report problems with dedicated interfaces as described in paragraph 1 to their respective competent national authorities without delay.</p> <p>4. As part of a contingency mechanism, payment service providers referred to in Article 30(1) shall be allowed to make use of the interfaces made available to the payment service users for the authentication and communication with their account servicing payment service provider, until the dedicated interface is restored to the level of availability and performance provided for in Article 32.</p> <p>5. For this purpose, account servicing payment service providers shall ensure that the payment service providers referred to in Article 30(1) can be identified and can rely on the authentication procedures provided by the account servicing payment service provider to the payment service user. Where the payment service providers referred to in Article 30(1) make use of the interface referred to in paragraph 4 they shall:</p> <p>(a) take the necessary measures to ensure that they do not access, store or process data</p>
